Part #TBB-DO

Biondo Racing "Double 0" Button

Wiring

- 1) COM (common) to 12 volt source.
- 2) NC (normally closed) not used.
- 3) NO (normally open) to 12 volt terminal on Tran Brake Solenoid.

(For any other application refer to the specific provided with your electronics.)

Two shims included for easy installation. Shims are used to fill space between the actuator, and the bracket.
